## **Advocacy Committee Report**

General Meeting  
Miramichi, NB  
October 4th, 2008

---

In June, a campaign on *Medication safety enhanced by drug distribution systems* was launched by the National Advocacy Committee. This campaign focuses on the benefits of unit dose systems, and the technology required supporting efficient and safe drug distribution processes.

Roberta Baker, the Committee's NS representative, and I are actively working on the next campaign to follow, on Pharmacist's role in patient safety.

It is with great please that I report that moving forward, this committee with be co-chaired by Moira Wilson, Director of Pharmacy Services at the Atlantic Health Sciences Corporation, and I. Andrew Brilliant, Moira Wilson and I met on September 16 to discuss possible initiatives for the upcoming year.

Respectfully submitted,  
Chantal Michaud
